Our Mission
To maximize student learning, NESA serves member schools by facilitating sustainable and systemic school improvement based on the best practices of American and international education.

Our Vision
NESA will create dynamic, collaborative professional relationships that transcend current barriers and boundaries in order to maximize student learning in member schools.

Our Beliefs
NESA, a community of schools, strives to create a sense of belonging and identity, diminish feelings of professional isolation and foster a culture of mutual support and professional engagement.

We believe:
• Individuals and organizations thrive only through continuous, transformative learning;
• Diversity strengthens us, enriches us, and prepares us for an increasingly complex world;
• Respect, integrity and trust are essential to create and sustain learning communities.

Welcome to SEC 2018!

At NESA we focus on adult learning because we know it impacts student learning. With our mission held up as our touchstone, we help to grow cultures of thinking, and cycles of inquiry within and amongst our NESA schools. Across the region, these cultures are networked and growing. As teachers collaborate, model, plan and practice, individual agency for each teacher is supported. We know that learning must be active. As with our students, we support our teachers in this powerful stance of inquiry, growth mindset, practice and reflection.

Please take a minute to review our learning principles, planning process and adult learning continuum featured on page 4 of this NESA Conference Program. You will notice we support cycles of learning that include time for professionals to pull away, learn and collaborate with experts as well as peers, then continue learning once back at school and “on the job” practicing, piloting, reflecting, evaluating.

In closing, we are delighted you have chosen to be with us for the NESA Spring Educator’s Conference. Our best hope is that the days ahead will offer inspiration, transformational learning and new networks and relationships that will support your teaching.

— Madeleine Hewitt, NESA Executive Director
